## U.S. Department of Housing and Urban Development – Real Estate Assessment Center "Cheat Sheet" for the 4.0 Physical Inspection Report

With the rollout of the new Uniform Physical Condition Standards (UPCS) inspection software (version 4.0), the Real Estate Assessment Center (REAC) now has the capability to collect more detailed information about observations made during the inspection of properties. Therefore, the report has been modified to provide this detailed information, and also to make the results of the inspection more clear. This "Cheat Sheet" provides a basic summary of the various sections of the modified report, listed in the order in which they appear.

- <u>'Inspection Snapshot'</u> provides a high level summary of the inspection.
- <u>'Property Profile'</u> (see figure 1 below) identifies the number of Buildings and Units together with the occupancy information.
- <u>'Participant Profile'</u> (see figure 2 below) identifies property participants and provides their contact information. A new presence indicator will show who amongst the property participants (Management Agent, Owner and/or Site Manager) were present at the time of inspection.
- <u>'Score Summary'</u> (see figure 3 below) provides an overview of the inspection score for each of the 5 inspectable areas.
- <u>'Health & Safety Summary'</u> shows any observed 'Life' and/or 'Non-Life' threatening 'Health & Safety' deficiencies.
- <u>'Systemic Deficiencies'</u> shows 'Capital' and 'Ordinary' repair items.
- <u>'Building/Unit Summary'</u> (see figure 4 below) provides important property data, including 'Year of Construction', 'Number of Floors' and 'Building Type'.
- <u>'Certificates'</u> provides a listing of certifications that may be required for the property.
- <u>'Score Details'</u> provides an explanation of the score for the property including the source of any points deducted. Note that the inspection software allows for the recording of the same deficiency as many times as it occurs. However, it is only scored once. The number within the parentheses after the Deficiency indicates the number of observations for this inspectable area.
- <u>'Deficiency Details'</u> (see figure 5 below) identifies all recorded deficiencies for an inspectable area. The Decisions Column in this section lists the details on how the inspector identified the defect. While the 'Score Details' page described above focused on the number of points deducted, this section will identify all cited deficiencies, regardless of impact on score.
